

Dear Resident,

Ontario Street is being improved this summer! The City of Dover has contracted with Interstate Concrete and Asphalt to improve Ontario in the location shown in the map below. The Independent Highway District and Syringa Water District will also be completing portions of the project.

The City of Sandpoint is also planning a separate but adjacent Ontario Street project that may overlap or extend the construction timeframe for Ontario St disruptions. The City of Dover is collaborating with the City of Sandpoint to get all the work done this year with the least number of disruptions possible.

Dover Phase 1 of the two-phase project entails the installation of a pressure sewer main extension. Ontario Avenue will be closed; however, it will remain accessible to residents who have driveways connecting with Ontario or must use Ontario to access Canoe Cove. There will be brief delays when the contractor must work in the intersection of Ontario and Canoe Cove. After the first phase has been completed, a temporary gravel driving surface will be placed. During this time, Syringa Water District will also be independently performing water system upgrades in the intersection of Ontario and Canoe Cove.

Dover Phase 2 includes road repairs and reconstruction by the Independent Highway District. This will be followed by final new pavement being placed by the contractor and final clean up. On paving day, each lane of Ontario Street must be closed for 2-4 hours during paving due to the narrow road widths. There are no public locations available for nearly off-street parking to walk to residences. If you require any special accommodations during these closures, please notify the Dover City Clerk at (208)265-8339. Emergency services will still have access during the closure with assistance by the contractor.

Please be aware that there may be disruptions to delivery services during this time, at the delivery company's discretion. Additional questions about the project may be directed to the City Clerk at (208)265-8339.

P.O. Box 115, 699 Lakeshore Ave., Dover, ID 83825

In order to minimize project costs, the construction schedule remains flexible, but the current schedule is below. A second notification will be sent to affected residents when construction dates are confirmed.

- Phase 1: Week of July 6th through July 15th
- Phase 2: Week of July 18th through July 22nd (the temporary road closure will occur on a portion of one day this week – you will be notified prior to paving day)
- Sandpoint Project – TBD

Thank you,

City of Dover
