

Dear Resident,

Ontario Street is being improved this summer! The City of Dover has contracted with Interstate Concrete and Asphalt to improve Ontario in the location shown in the map below. The Independent Highway District and Syringa Water District will also be completing portions of the project.

The City of Sandpoint is also planning a separate but adjacent Ontario Street project that may overlap or extend the construction timeframe for Ontario St disruptions. The City of Dover is collaborating with the City of Sandpoint to get all the work done this year with the least number of disruptions possible.

Dover Phase 1 of the two-phase project entails the installation of a pressure sewer main extension. Ontario Avenue will be closed; however, it will remain accessible to residents who have driveways connecting with Ontario or must use Ontario to access Canoe Cove. There will be brief delays when the contractor must work in the intersection of Ontario and Canoe Cove. After the first phase has been completed, a temporary gravel driving surface will be placed. During this time, Syringa Water District will also be independently performing water system upgrades in the intersection of Ontario and Canoe Cove.

**Phase I will begin the week of
July 25th, 2022**
